- You can call cyber crime helpline or try seeking help from the online portal
- 1930
- cybercrime helpline handled by the state govt, example : TN 1930
- Helpline 1930

NOTES

This task focuses on the usage of coding and collaborative platforms that are extremely important in today's world. On Hacker Rank, I solved 2 basic challenges, and I would like to continue using this platform for my coding practice because it's very useful to strengthen my basics before proceeding with complex coding. The Google Forms quiz is on Digital Literacy awareness, and this tool allows us to create a survey and collect data from people who are in different places. It also summarizes all the responses and produces a statistical representation wherever possible, making it very easy to use.
